

## NAVFAC HQ, Washington Navy Yard Strategic & Global Planning

Strategic & Global Planning is the long-term bridge between Warfighter Strategic objectives and the physical infrastructure needed to support them world-wide.

Our products and services encompass a wide variety of plans that include visioning and futurists view-points to the capital improvement layouts at individual installations. In both the development of our plans and in tracking of their execution, we employ many different planning techniques and methodologies. These range from scenario building to visualization, constraint analysis to cost-benefit analysis, and from disaster recovery to contingency planning.

Our planners work in a diverse interdisciplinary environment and call upon a variety of skills to insure adequate stakeholder involvement and commitment. Navy planning practice not only spans the globe but the vast DoD organization. NAVFAC planners are instrumental in translating the Navy's operational requirements into implementing actions, whether they are design,

environmental, engineering, or fiscal. Cooperation and collaboration with local communities, as well host nation governments, is another key skill our planners bring to all projects.

In a time when futures are less certain and resources are more constrained, planning services are in greater demand. More emphasis is being placed on Long-Range planning and programmatic resource allocation. Asset Management's Strategic & Global Planning is well poised to meet this growing need.

### ***Innovation, Leadership, Performance***

The Naval Facilities Engineering Command (NAVFAC) manages the planning, design, construction, contingency engineering, real estate, environmental, and public works support for U.S. Navy shore facilities around the world. We provide the Navy's forces with the operating, expeditionary, support and training base's they need. NAVFAC is a global organization with an annual volume of business in excess of \$18 billion. As a major Navy Systems Command and an integral member of the Navy and Marine Corps team, NAVFAC delivers timely and effective facilities engineering solutions worldwide. Additional updates and information about NAVFAC can be found on social media sites Facebook and Twitter. Become a Fan at <http://www.facebook.com/navfac> and follow us on <http://twitter.com/NAVFAC>.
