	2.1 PSPDF Viewer	2
	2.1.1 Documents Section	. 2
	2.1.2 Attachments Tab	. 2
	2.2 Browser View	4

1 Background

Attachments come in many different formats and file types, but in eCMS can be broken down into two types:

- 1. Non-PDF Attachments
 - a. Must download copy to local machine, make edits/revisions using desktop applications, and re-upload revised file to eCMS
- 2. PDF Attachments
 - a. Gain additional functionality and flexibility through the PSPDF Viewer:
 - i. Page Tools (pan, zoom, layout, rotation)
 - ii. PDF Visualization (different views of PDF)
 - iii. Drawing Tools (draw/highlight, insert images and stamps, text, shapes, etc.)
 - iv. Exporting Tools (printing, saving, creating revisions
 - b. Powerful tool that allows for editing and revising PDFs without having to leave the eCMS application

When working with PDF attachments in eCMS, you may find you wish to bypass PSPDF Viewer in favor of opening the PDF attachment in the more common, browser view.

2 Opening PDF Attachments in eCMS

There are two ways to open a PDF attachment in eCMS:

- 1. Using PSPDF Viewer (see 2.1 PSPDF Viewer)
- 2. Using the web browser (see 2.2 Browser View)

2.1 **PSPDF Viewer**

When opening PDF attachments that are associated with an eCMS record, there are two main ways to launch the PSPDF Viewer:

2.1.1 Documents Section

- 1. Navigate to eCMS and log in
- 2. Locate the eCMS record that has PDF attachments you wish to open
