

OFF-BASE DRINKING WATER SAMPLING NEAR MARINE CORPS AIR STATION BEAUFORT

The Navy and Marine Corps are conducting drinking water well sampling near MCAS Beaufort beginning in December 2022. The sampling is for certain per- and polyfluoroalkyl substances (PFAS), which may be present in these drinking water wells due to past use of firefighting foam or other PFAS-containing materials on base. We believe your property either uses public drinking water or does not have a drinking water well. So although your property is within the sampling area, we do not need to sample your drinking water.

If our records are incorrect, and you have a drinking water well on your property, the Navy and Marine Corps would like permission to sample your drinking water at no cost to you. You may schedule a drinking water well sampling appointment by calling **800-818-8455** and leaving a message with your name, property address, and telephone number.

We also invite you to attend an Open House:

Thursday, December 8, 2022 | Anytime between 4:30 pm-6:30 pm
Holiday Inn & Suites
2225 Boundary Street, Beaufort, South Carolina 29902

We will have informational displays about this sampling along with representatives from the Navy and Marine Corps, South Carolina Department of Health and Environmental Control, and the Agency for Toxic Substances and Disease Registry available to answer questions you may have.

We are committed to keeping the public informed of the Navy and Marine Corps' off-base drinking water sampling. For more information, please visit our website at:
