

Marine Corps Outlying Landing Field Camp Davis Drinking Water Sampling Information
Virtual Open House

Residents near Marine Corps Outlying Landing Field (MCOLF) Camp Davis at Marine Corps Base Camp Lejeune and other interested parties are invited to attend an online virtual open house to learn about the Department of the Navy's offer to test drinking water from wells within a designated area near MCOLF Camp Davis which may have been impacted by per- and polyfluoroalkyl substances (PFAS). The Department of the Navy has developed a proactive policy to assess certain PFAS on and near installations which have known or potential releases of these compounds into the environment. These are compounds frequently found in firefighting foam, aqueous film-forming foam (AFFF), and various industrial and consumer products.

Due to the COVID-19 pandemic, the Navy and Marine Corps will be hosting an online Virtual Open House in lieu of an in-person open house. We invite you to attend the Virtual Open House that will be available to view beginning on 22 March 2021 at the following website: <https://www.Lejeune.marines.mil/CampDavisPFAS>. The Virtual Open House will be available for viewing until 25 June 2021.

We are working in partnership with the United States Environmental Protection Agency Region 4, the North Carolina Department of Environmental Quality, the North Carolina Department of Health and Human Services, and the Onslow County Health Department.

If you are not able to access the Virtual Open House, please contact us via email, CampDavisPFAS@usmc.mil, or via telephone, 866-MCDAVIS (866-623-2847) to have the Virtual Open House materials provided to you via U.S. mail or email.

For additional information regarding PFAS, you may visit the public web site at <https://go.usa.gov/xAFx5> and www.secnav.navy.mil/eie/pages/pfc-pfas.aspx
