

Navy Open House

to discuss initial results of the Atlantic Field Drinking Water Investigation

Additionally, property owners whose drinking water wells in the sampling area have not already been tested for per- and polyfluoroalkyl substances may still request sampling.

There is no legal requirement to conduct drinking water testing; it is a voluntary measure being offered by the Navy as an added precaution for our neighbors.

For more information on this project, please attend the open house or visit the website at <https://go.usa.gov/xR6SX>.

You can schedule testing of your drinking water well by attending the open house or by calling the toll free number at **1-877-626-5317** and leaving a message.
