

Drinking Water Investigation near Atlantic Field

In 2017–2018, the Navy completed requested sampling of drinking water from private wells near Atlantic Field. Samples were collected from 269 wells. Detections of PFAS exceeded the USEPA’s lifetime health advisory for PFOA and PFOS in 2 wells. The Navy is conducting an on-base investigation, to include sampling of groundwater, surface water, and sediment, to determine whether Atlantic Field is the source of PFAS in the off-base drinking water wells. Upon completion of the investigation, the Navy will share the results of the investigation with the public as well as federal, state, and local agency partners.

Owners of property in Atlantic, N.C. whose drinking water has not been tested may request sampling by calling **1-877-MCOLF17 (1-877-626-3517)**.
