

Naval Air Station Oceana Ongoing PFAS Investigation and Response

*The drinking water provided by the City of Virginia Beach has been tested;
PFOS and PFOA were not detected.*

The U.S. Navy is conducting an ongoing private drinking water well investigation around Naval Air Station Oceana. The chemicals the Navy is testing for, PFOS and PFOA, could be present in private drinking water wells around NAS Oceana due to past uses of the fire-fighting agent called aqueous film forming foam.

Based on our records review, we believe your property consumes City of Virginia Beach drinking water and no private drinking water wells are present on your property. Because of this, no sampling is needed on your property. Additional information is available at <https://www.vbgov.com/waterquality>.

If you are interested in the Navy's investigation, we invite you to visit the website at www.cnmc.navy.mil/oceana_water_info, which will be updated as more information becomes available.

We are committed to keeping the public informed of the Navy's investigation. **If our records are incorrect and you do have a private drinking water well on your property, please leave a voicemail at 757-341-0485.**
