**Time Collected**

Below are the validated test results confirming that your drinking water is below the U.S. Environmental Protection Agency’s (EPA) lifetime health advisory (L-HA) level for perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS) and the EPA’s Regional Screening Level for perfluorobutanesulfonic acid (PFBS). The Navy is planning to conduct quarterly sampling of drinking water wells where PFOS and/or PFOA were detected above 40 parts per trillion (ppt), but below the EPA L-HA of 70 ppt. The purpose of this monitoring is to evaluate the temporal variability of PFAS concentrations in off-base drinking water wells and to provide alternative drinking water if concentrations exceed the EPA L-HA. Additional sampling will be necessary to aid this evaluation and ensure protection of human health. We will keep you informed of the plans for periodic sampling.

The Navy is working in partnership with the EPA, the City of Virginia Beach, the Virginia Department of Environmental Quality, the Virginia Department of Health, and the Agency for Toxic Substances and Disease Registry to develop a long-term solution associated with PFOA and PFOS in groundwater resulting from activities at NAS Oceana.

**Results of Laboratory Analytical Tests for PFAS/PFCs\* with EPA Health Advisory Levels**

<b>Chemical Name</b>	<b>Result (ppt)</b>	<b>Validator Qualifier</b>	<b>Lifetime Health Advisory (ppt)</b>
Perfluorooctane Sulfonate (PFOS)			70
Perfluorooctanoic acid (PFOA)			70
Total PFOS/PFOA (cumulative)			70

**Results for other PFAS/PFCs\* where no EPA Health Advisory Levels have been established**

<b>Chemical Name</b>	<b>Result (ppt)</b>	<b>Validator Qualifier</b>	<b>Lifetime Health Advisory (ppt)</b>
Perfluorobutanesulfonic acid (PFBS)			N/A <sup>1</sup>
Perfluoroheptanoic acid (PFHpA)			N/A
Perfluorohexanesulfonic acid (PFHxS)			N/A
Perfluorononanoic acid (PFNA)			N/A

J - Analyte present, but result is estimated

<sup>1</sup> While no health advisory exists for this chemical, EPA has established a Regional Screening Level of 400,000 ppt.

\*PFAS – per-and polyfluoroalkyl substances

\*PFCs – perfluorinated compounds
