Dear Property Owner:

SUBJECT: DRINKING WATER SAMPLING RESULTS IN THE VICINITY OF NAVAL AIR STATION OCEANA

Thank you for recently allowing the Navy to sample your drinking water well for certain per- and polyfluoroalkyl substances (PFAS). I am writing today regarding the test results of your property's drinking water. The test results are provided in the enclosures to this letter.

The test results have been validated and they confirm that certain PFAS, specifically perfluorooctanoic acid (PFOA) and perfluorooctane sulfonate (PFOS), in your drinking water are below the U.S. Environmental Protection Agency's (EPA) lifetime health advisory levels. The enclosures also provide the test results for other PFAS included in the drinking water test method used for this investigation (EPA Method 537.1). There are no lifetime health advisories for the other PFAS at this time. The validated test results indicate that no further action is required at your property at this time.

The Navy continues to work in partnership with the EPA Region 3, the Virginia Department of Environmental Quality, the Virginia Department of Health, and the City of Virginia Beach. If new regulatory information on PFAS becomes available, we will ensure you are made aware of any future actions the Navy will take.

We are committed to keeping you informed on developments that may impact you and your neighbors. We will continue to update our public website to keep residents informed about the PFAS investigation as information, research, and regulation from federal, state, or local agencies evolve. The link to the website is: <https://go.usa.gov/xM3mJ>.

Additional informative resources on PFAS can be found at the Assistant Secretary of the Navy (Energy, Installations & Environment) website on PFAS and at EPA's website on the Drinking Water Health Advisories for PFOA and PFOS. Both links are provided as follows:

If you have any health questions or concerns, I encourage you to contact your health care provider. If you have any further questions on the process and our next steps, please contact Jillian Wheeler, NAVFAC Mid-Atlantic Remedial Project Manager, at [jillian.wheeler@navy.mil](mailto:jillian.wheeler@navy.mil) or leave a voicemail at 757-341-0485.

We appreciate your continued cooperation as we work to ensure that human health and the environment are protected.

Sincerely,

R. L. HOLMES  
Captain, U.S. Navy  
Commanding Officer
