

OFF-BASE DRINKING WATER WELL SAMPLING NEAR ST. JULIENS CREEK ANNEX

The Navy is conducting drinking water well sampling near St. Juliens Creek Annex beginning in February 2024. The sampling is for certain per- and polyfluoroalkyl substances (PFAS), which may be present in these drinking water wells due to past use of firefighting foam or other PFAS-containing materials on base. We believe the drinking water consumed on the property you rent may come from a well.

A separate notification letter asking permission to sample the drinking water well on this property has been sent to the mailing address of the owner on record, and no action is required on your part. This sampling would be at no cost to you or the owner. We invite you to attend an Open House Public Meeting:

Tuesday, February 6, 2024

anytime between 4:30 and 6:30 p.m.

**Gymnasium at G.A. Treacle Elementary School
2500 Gilmerton Road, Chesapeake, VA 23323**

The Open House Public Meeting will have detailed informational displays about the proposed drinking water well sampling near St. Juliens Creek Annex. Representatives from the Navy, the U.S. Environmental Protection Agency, the Virginia Department of Environmental Quality, the Virginia Department of Health (including the Chesapeake Health District), and the City of Chesapeake will be available to answer questions you may have.

We are committed to keeping the public informed of the Navy's drinking water well sampling. For more information, please visit our website at: http://www.navfac.navy.mil/SJCA_PFAS.
