Naval Air Station Jacksonville Restoration Advisory Board (RAB)

Notice of Adjournment of the RAB October 2024

In accordance with Department of Defense Policy regarding Restoration Advisory Board (RAB) operations, and with the concurrence of the installation Commanding Officer, the Naval Air Station (NAS) Jacksonville Installation Restoration Partnering Team has decided to adjourn the RAB due to insufficient community interest.

Although we are adjourning the RAB as a formal board, NAS Jacksonville will continue corrective actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and there will be opportunities for public review and comment on restoration activities. We will continue to provide information to the public on the restoration progress at NAS Jacksonville as required by law including making public notices, maintaining an information repository at the Webb Wesconnet Library,

located at 6887 103rd St, Jacksonville, Florida, and making electronic postings on the Naval Installation Restoration Information Solution (NIRIS) website <https://go.usa.gov/xJ69>. The RAB may be reestablished by the Commanding Officer at any time there is deemed to be a need or interest. Additionally, the Partnering Team will conduct a survey every 24 months to determine if there is sufficient public interest in establishing a RAB for NAS Jacksonville.

**For additional information or
to express opposition to adjourning the RAB, please contact**

Mr. David Ford,
Installation Restoration Program Manager
NAS Jacksonville
PO Box 50 | Jacksonville, FL 322120-0050
