Dear Sir or Madam:

SUBJECT: DRINKING WATER WELL SAMPLING RESULTS NEAR
NAVAL AIR STATION PENSACOLA

Thank you for recently allowing the Navy to sample your drinking water well for specific per- and polyfluoroalkyl substances (PFAS). I am writing to you today about the results of your property's drinking water that was sampled in Month 2025. PFAS were detected at or above the Department of Defense (DoD) PFAS Interim Action Levels for Private Drinking Water Wells levels in the sample collected from your drinking water well.

Enclosures 1 and 2 provide the validated results for your drinking water well sample, which was analyzed using the EPA drinking water test methods 533 and 537.1. If your drinking water well was previously sampled by the Navy, those results are also provided in Enclosures 1 and 2. The Navy will provide an enduring solution to address PFAS in your drinking water well.

In April 2024, the United States Environmental Protection Agency (EPA) published nationwide PFAS drinking water standards that public drinking water systems must meet by April 26, 2029. These standards do not apply to private drinking water wells. The DoD, the parent agency of the Navy, issued a policy in September 2024 that takes into account these nationwide standards to address certain PFAS in private drinking water wells. This policy authorizes the Navy to implement enduring solutions to address private drinking water wells where certain PFAS are at or above the DoD PFAS Interim Action Levels for Private Drinking Water Wells established in the policy. These levels are provided in Enclosure 1.

Information about the Navy's drinking water sampling near Naval Air Station Pensacola can be found at the following website: <https://go.mil/nasp-pfas>

Additional information from DoD and EPA can be found on the following websites:

DoD: <https://www.acq.osd.mil/eie/eer/ecc/pfas/>

EPA: <https://www.epa.gov/pfas>

Please be assured, the Navy continues to work in partnership with the U.S. EPA, Florida Department of Environmental Protection, and Florida Department of Health to fulfill our cleanup responsibilities. The Navy is committed to ensuring the safety of its neighbors and will keep you informed of developments that may impact you and our community.

The Navy appreciates your continued understanding and cooperation with its PFAS investigation. If you have any questions, please contact the Navy's Public Affairs Officer via email, CNIC_SE_PNSC_PAO@us.navy.mil or phone, 866-470-NASP (866-470-6277).

Sincerely,

Captain Chandra Newman
Commanding Officer
Naval Air Station Pensacola
