

# Off-Base Drinking Water Investigation near Naval Air Station Whiting Field

The Navy is conducting a drinking water well investigation in the current designated sampling area near Naval Air Station (NAS) Whiting Field beginning in February 2021. The Navy is testing for certain per- and polyfluoroalkyl substances (PFAS), which may be present in these drinking water wells due to past uses on-base of aqueous film-forming foam (AFFF), or other PFAS-containing materials. We believe the drinking water consumed on the property you rent may come from a well.

**A separate notification letter asking permission to sample the drinking water on this property has been sent to the owner, and no action is required on your part.** This sampling would be at no cost to you or the owner.

We are committed to keeping the public informed of the Navy's investigation. For more information, please visit our website at: <http://go.usa.gov/xAEQF>.

We also invite you to attend a Virtual Open House on the internet from February 23 through mid-April, 2021, at <https://WhitingFieldPFAS.com>. We will have informational posters and fact sheets available for your review.

If you prefer to receive copies of the information from the Virtual Open House website in the mail, please call **844-NASWFLD (844-627-9353)** and leave a message with your name and mailing address so we can send you the printed material.
