PRIVATE DRINKING WATER WELL SAMPLING NEAR NAVAL AIR STATION WHITING FIELD AND ITS OUTLYING LANDING FIELDS

The Navy is conducting drinking water well sampling near Naval Air Station Whiting Field and its outlying landing fields beginning in August 2026. The sampling is for certain per- and polyfluoroalkyl substances (PFAS), which may be present in drinking water wells due to past use of firefighting foam or other PFAS-containing materials on base. Our records indicate the drinking water consumed at this property may come from a well.

A separate notification letter has been sent to the property owner asking permission to sample the drinking water well on this property. No action is required on your part to schedule sampling. This sampling is at no cost to you or the property owner.

The Navy is committed to keeping the public informed of its drinking water well sampling. You are welcome to visit our website at **https://www.navfac.navy.mil/NASWF** for additional information on the project background and the drinking water well sampling.

The Navy will also be hosting an in-person open house event at a later date. A separate invitation will be mailed to you with the event date, time, and location once the open house is scheduled.
