

SECOND NOTICE REQUESTING PERMISSION TO SAMPLE YOUR DRINKING WATER WELL.

The Navy is offering to sample your drinking water if you have a drinking water well on your property that is located within the designated sampling area.

PFAS may be present in drinking water wells near Outlying Landing Field (OLF) Barin, an OLF for Naval Air Station (NAS) Whiting Field, due to past use on-base of firefighting foam, specifically aqueous film forming foam. There is no legal requirement to conduct this drinking water sampling. It is a voluntary measure to ensure that PFAS that may have migrated to off-base drinking water sources are not in our neighbors' drinking water wells at levels above the U.S. Environmental Protection Agency's drinking water lifetime health advisory. This is your second notice that the Navy seeks permission to sample drinking water wells in the designated sampling area that have not already been sampled.

Additional drinking water sampling appointments are being scheduled for August 2021. To schedule your drinking water well appointment, please call the toll free number and leave a message at 844-NASWFLD (844-627-9353).

For more information on this project, please visit the website at <https://go.usa.gov/xAEQF> or access the virtual open house at www.WhitingFieldPFAS.com.
