

Drinking Water Investigation near Outlying Landing Field Brewton

The Navy began a drinking water well investigation near Outlying Landing Field (OLF) Brewton, an OLF for Naval Air Station (NAS) Whiting Field, in June 2021. The Navy tested for certain per- and polyfluoroalkyl substances (PFAS), specifically perfluorooctane sulfonate (PFOS) and perfluorooctanoic acid (PFOA), which may be present in these drinking water wells due to past uses on-base of aqueous film-forming foam (AFFF), or other PFAS-containing materials.

PFOA and PFOS were not detected in any of the wells sampled.

Our records indicate that you are a resident and/or property owner in the sampling area and your drinking water well has been tested.

If you have questions regarding your sampling results, please call 844-NASWFLD (844-627-9353) and leave a message with your name and phone number.
