ADDRESSING PFAS IN PRIVATE DRINKING WATER WELLS NEAR OUTLYING LANDING FIELD SILVERHILL

The Navy is taking action near Outlying Landing Field (OLF) Silverhill, an OLF of Naval Air Station Whiting Field, to address certain per- and polyfluoroalkyl substances (PFAS) in drinking water due to past use of firefighting foam or other PFAS-containing materials on base.

The Navy has sampled the drinking water well at this property. The Navy has determined that additional action is needed to address PFAS in the drinking water well at this property.

A separate notification letter has been sent to the property owner to discuss options for addressing PFAS in the drinking water well at this property. No action is required on your part.

The Navy is committed to keeping the public informed of its drinking water well sampling. You are welcome to visit our website at **https://www.navfac.navy.mil/NASWF** for additional information on the project background and the drinking water well sampling.

The Navy will also be hosting an in-person open house event at a later date. A separate invitation will be mailed to you with the event date, time, and location once the open house is scheduled.
