

**This NOTICE is a follow-up request to a previous letter sent in October 2017 requesting permission to allow the Navy to sample your private drinking water well.**

*Out of concern for our neighbors and a desire to be proactive, the Navy is offering to test your drinking water for certain per- and polyfluoroalkyl substances.* The Navy is seeking the public's assistance to verify the sources of drinking water in areas surrounding Atlantic Field and to identify any additional drinking water wells in this area. There is no legal requirement to conduct drinking water testing; it is a voluntary measure recommended by the Navy because the water quality for our off-base neighbors is a priority.

For more information on this project, please visit the website: <https://go.usa.gov/xR6SX>. To schedule testing of your drinking water, please call the toll free number and leave a message at 1-877-MCOLF17 (626-5317) or request an appointment at the website.
