US Navy Cleanup Project

This is a US Navy funded Time Critical Removal Action (TCRA), following the Comprehensive Environmental Response, Compensation, and Liability Act CERCLA, the National Oil and Hazardous Pollution Contingency Plan (NCP) (40 Code of Federal Regulations [CFR] 300.5) and substantive requirements of the Washington State Model Toxics Control Act (MTCA, Washington Administrative Code 173-340-515).

The Navy's contractor will be working Monday through Thursday only.

For the Period: April 29, 2014 **Through:** May 5, 2014
Date of Report: May 6, 2014

Summary of Activities:

Work Accomplished:

- Continued the alpha/beta scanning and bias static sampling of the walls and 1st floor of the Building 27 South Shed.
- Conducted remediation of elevated biased static readings on the walls of Building 27 South Shed.
- Collected FSS samples and gamma statics from sink drain line trench (TSU 20) inside Building 27.
- Collected FSS soil samples and gamma statics from the hot spot excavations (SU 6, SU 7, & SU 8).
- Completed the removal of the stair treads in the Building 27 Stair Towers.
- Completed weekly security inspections and RMA boundary surveys/sampling.
- Completed weekly Tisch filter collection/change-out.

Activities Planned for Next Week:

- Continue the FSS scans of the Building 27 South Shed.
- Continue the FSS scans of the Building 27 Stair Towers.
- Complete the repairs of the remediated survey units in the 2nd floor of Building 2 (pending Washington Department of Health confirmation sampling).
- Complete the discharge of the sampled waste water to sanitary sewer.
- Clean out and return one holding tank and dewatering box.
- Perform the remediation and sampling of TSU 2 (excavation beneath the exposed gas main adjacent to Building 27).
- Perform the remediation and sampling of Hot Spot 7 (excavation adjacent to NOAA Road).

Status of Schedule:

- Schedule delayed. TCRA completion summer 2014.
