

## Naval Facilities Engineering Command, Hawaii

**N**aval Facilities Engineering Command (NAVFAC) Hawaii, established on March 10, 2005, delivers best-value facilities and utilities acquisition, asset management, engineering, environmental, planning, and public works services to Navy, Marine Corps, Air Force, Department of Defense, and other federal agency customers in the state.

NAVFAC Hawaii is led by a Commanding Officer, CAPT Michael D. Williamson, who also serves as the Regional Engineer for Commander Navy Region Hawaii. NAVFAC Hawaii is an Echelon IV command reporting to the NAVFAC Pacific an Echelon III command also located on Oahu. Both report to NAVFAC Headquarters an Echelon II command in Washington, D.C.

Headquartered at Joint Base Pearl Harbor-Hickam (JBPHH), NAVFAC Hawaii has a workforce of approximately 1,350 highly-skilled civilian federal workers and 220 Navy and Air Force military personnel – who execute work through four business lines: Asset Management, Capital Improvements, Environmental, and Public Works. The command delivers services through in-house shop forces and a broad range of contracting vehicles supported by Integrated Product Teams, two Public Works Departments, and a Resident Officer in Charge of Construction.

Customer interface is performed through public works officers, providing customers with planning and design capability throughout the entire NAVFAC organization as well as the command's Business Line (Asset Management, Capital Improvements, Environmental and Public Works), and Support Line leaders.

The organization's workforce is located throughout the Pearl Harbor-Hickam area as well as Leeward and Windward portions of Oahu, with a small number of employees at Pacific Missile Range Facility, Kauai. NAVFAC Hawaii's headquarters is located on a 71-acre compound off of Radford Drive near the Navy Exchange. Its mailing address is Commanding Officer, Naval Facilities Engineering Command Hawaii, 400 Marshall Road, JBPHH, HI 96860-3139.

Unlike most Navy commands, which receive operating funds solely through Congressional appropriation called Mission Funds (dollars to cover costs for a single fiscal year); NAVFAC Hawaii obtains both Navy Mission Funds and Navy Working Capital Funds (NWCF). NWCFs are produced by charging clients for the performance of a service, similar to the operations of a commercial business. However, unlike a commercial business, NAVFAC Hawaii does not operate for profit. It provides products and services to its clients on a break-even basis. Each year, the command reviews its rates to ensure that enough income is generated to pay for needed resources to fulfill customer requirements at the desired cost, quantity, and quality. In addition, it continuously monitors its rates to make certain they remain competitive with those in the private sector.

In FY12, NAVFAC Hawaii executed \$316.9 million Navy Working Capital Fund work and \$493 million General Fund work (major construction contracts & service contracts).
