

This e-mail is supported by NAVFAC's Alternative Restoration Technology Team (ARTT) to provide links to Technology Transfer (T2) tools and the latest information on policies, guidance, and training related to innovative technologies. The T2 topics highlighted in this issue will help support the ARTT's chartered goals of promoting the use of innovative technologies, removing barriers to implementing new technologies, and reducing cleanup costs, while remaining protective of the environment and human health.

NAVFAC Remediation Innovative Technology Seminar (RITS)

RITS offers presentations to provide Navy Remedial Project Managers, contractors, and others with information on new and innovative technologies, methodologies, and guidance in support of the Navy's Environmental Restoration (ER) Program. RITS is sponsored in coordination with NAVFAC Facilities Engineering Commands (FECs), the Base Realignment and Closure (BRAC) Program Management Office, and the Naval Facilities Engineering Command (NAVFAC) Engineering and Expeditionary Warfare Center (EXWC). Regulators and other stakeholders are welcome to attend as well as contractors, who must have a current Navy ER contract. The 2013 seminar topics include:

- Passive Sampling Techniques for Groundwater and Sediment Sites
- Advances in Sediment Characterization and Remediation
- Environmental Molecular Diagnostics Tools
- Introduction to Historical Radiological Assessments
- Lessons Learned from DNAPL Site Remediation
- Vapor Intrusion: Where Are We Today?
- What's Up in the Munitions Response Program?

Dates and locations for the seminars are as follows:

May 21 – 22	NAVFAC Southeast, Jacksonville, FL
May 29 – 30	NAVFAC Pacific/Hawaii, Honolulu, HI
June 3 – 4	NAVFAC Washington, Washington, DC
June 5 – 6	NAVFAC Atlantic/Mid-Atlantic, Norfolk, VA
June 17 – 18	NAVFAC Southwest, San Diego, CA
June 19 – 20	NAVFAC Northwest, Silverdale, WA

Visit the NAVFAC ERB Web site for more information about these topics, registration, and seminar logistics.
