Attn: Bronius Nemickas

Dear Sir:

HALLIBURTON NUS Environmental Corporation requests permission to sample a United States Geological Survey monitoring well as part of a Remedial Investigation being conducted in Bethpage, New York. We also request any construction details for the well that you could provide.

The well is monitoring well number 10623. It is located on the property of the United States Naval Weapons Industrial Reserve Plant, which is located within the Grumman Aerospace Corporation facility in Bethpage. The well will be purged before sampling. All purge water will be containerized and disposed of at the Grumman Wastewater Treatment Plant.

The results of this sampling event will be published in the Remedial Investigation in January, 1992. Also, results can be sent directly to you, if desired.

A rapid response would be greatly appreciated, as we propose to sample this well during the second week of October of this year.

Should you have any questions, please do not hesitate to call me at (412) 921-8375.

Sincerely,

Kevin C. Kilmartin, C.P.G., for

David Brayack, P.E.
