Contract Task Order WE06

Subject: Supplemental Offsite Soil Vapor Intrusion Monitoring Plan
For the Soil Vapor Extraction Containment System
Site 1 – Former Drum Marshalling Area
NWIRP Bethpage, New York

Dear Mr. Scharf:

On behalf of the Navy, please find the enclosed copy of the Supplemental Offsite Soil Vapor Intrusion Monitoring Plan for the Soil Vapor Extraction Containment System, Site 1 – Former Drum Marshalling Area at NWIRP Bethpage. This monitoring plan supplements the existing OM & M plan for the SVE Containment System and presents the vacuum field and soil gas monitoring to be conducted in the residential neighborhood east of Site 1 at NWIRP Bethpage. These monitoring activities will ensure the offsite vacuum field is maintained and the SVE Containment System continues to function as the mitigation system for the impacted and potentially impacted homes in the neighborhood.

If you have any questions please contact Ms. Lora Fly, NAVFAC Mid-LANT, at (757) 341-2012.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dave Brayack', with a small 'for' written below it.

Dave Brayack
