Northern Division
Naval Facilities Engineering Command
Philadelphia, PA 19112-5094

Dear Ron:

Subject: Transmittal of Round III Data Package for NASB RI/FS Program
Contract No. N62472-84-C-1108 Naval Air Station, Brunswick
Brunswick, Maine

Enclosed is our Data Package for the Round III sampling program conducted in April 1989 at NAS Brunswick. Contained in the Data Package are the following items:

- o Matrix identifying Round III sampling locations and compounds analyzed
- o Contaminant summary maps
- o Data Summary Tables for groundwater, leachate water, surface water, and sediment

A few comments should be made with regard to this data package.

- o At Site 2, LT-201 was not sampled until June 2, due to frozen conditions encountered during the April sampling.
- o Water levels recorded during the April sampling effort were consistent with earlier water level measurements. We do not see any significant changes in groundwater movement based on the April data.
- o During the two week period (March 27 - April 10) prior to Round III field sampling in April, 3.38 inches of rainfall were recorded at NAS Brunswick. During the sampling from April 10 through 21, 1.42 inches of rainfall were recorded.

We are pleased to provide you with this package and look forward to discussing this data with you.

Sincerely,

E. C. Jordan Co.

M. P. Dickenson, III
