**Re: *Monitoring Event 19 (October/November 2002) Report for Site 9***  
***Monitoring Event 19 (October/November 2002) Report for Sites 1, 3, and Eastern***  
***Plume, Naval Air Station Brunswick, Maine***

Dear Mr. Monaco:

Thank you for the opportunity to review the above reports, which were prepared for the Navy by EA Engineering, Science and Technology. We have no comment to these reports at this time. Regarding the results presented in the reports, we will reserve comment until the draft 2001 annual report is presented.

EPA's primary concerns with the Eastern Plume are concurrently being worked through by the additional investigations proposed by the Navy and EPA. Also, for site 9, the Technical Evaluation Group (TEG), is working on a well optimization proposal.

For any questions, please contact me at 617.918.1344 or [barry.michael@epa.gov](mailto:barry.michael@epa.gov).

Sincerely,

  
Michael S. Barry  
Remedial Project Manager  
Federal Facilities Superfund Section
