RE: DRAFT ENGINEERING EVALUATION/COST ANALYSIS (EEICA)  
FOR IR SITE 2 - FIRE TRAINING AREA, NAVAL WEAPONS INDUSTRIAL  
RESERVE PLANT (NWIRP), CALVERTON, NEW YORK.  
EPA ID # NYD003995198

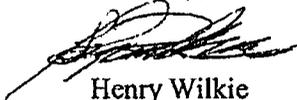

Dear Ms. Fly:

The referenced document dated April 2008, has been reviewed by this office. The Work Plan is acceptable and maybe implemented with following conditions:

- The plan must include an oxygen releasing compound to take care of contaminants that may be liberated during excavation or from to surface water infiltration after the petroleum contaminated soil zones and concrete ring are removed;
- The Department understands that it is premature to consider options for potential groundwater contamination at this time. However, after the remedial alternative has been implemented and followup groundwater monitoring has occurred, the Navy will need to select an appropriate remedial option for contaminated groundwater for any migrating contaminants that are found; and
- The Soil Cleanup Objective (SCOs) need to be incorporated to the Applicable or Relevant and Appropriate Requirements (ARARS).

Should you have any questions regarding the content of this letter, please do not hesitate to contact me at (518) 402-8594 or email me at [hjwilkie@gw.dec.state.ny.us](mailto:hjwilkie@gw.dec.state.ny.us).

Sincerely,

Henry Wilkie  
Environmental Engineer 1
