Mr. Jeff McCullough
Project Engineer
New York State Department of Environmental Conservation
Federal Facilities Section
625 Broadway
Albany, NY 12233-7015

05 OCT 2001

Dear Jeff:

Subj: Draft Proposed Remedial Action Plan (PRAP) for IR Site 7 - Fuel Depot; Naval Weapons Industrial Reserve Plant (NWIRP) Calverton, New York

The Navy is forwarding the subject Draft PRAP for your review and comment. Although this PRAP was developed by the Department of Navy, it was prepared following an outline for a PRAP for a Groundwater Remedy that was recently issued by NYSDEC in June 2000 for the Navy/Northrop Grumman facilities in Bethpage, New York. This PRAP is being issued by the Navy as a component of NYSDEC's Citizen Participation Plan pursuant to New York State Environmental Conservation Law and 6 NYCRR Part 375.

The Navy will incorporate any comments that you may have into a revised Draft PRAP that will subsequently be distributed to Calverton's RAB for review. At that time, the Navy will also put a copy of the revised Draft PRAP in the Information Repository and issue a notice of availability to the local community that will initiate the 30-day public comment period.

In addition, when the Navy issues the revised Draft PRAP for public comment, a Final version of the Feasibility Study (FS) for Site 7 will also be distributed. There were no changes to the Draft document since no adverse comments were received during the document review period. A copy of the Final FS will also be added to the Navy's information repository located at the Riverhead Free Library.

The Navy would like to initiate design and construction of the proposed remedy sometime within Fiscal Year 2002. Therefore, the Navy would like to complete the requirements of the Citizen's Participation Plan over the winter months and conduct a public meeting in the January/February 2002 timeframe.

As always, I would like to thank you for your continued support regarding the Navy's Installation Restoration Program. If you have any questions, please give me a call at (610) 595-0567, extension 163. Comments may be emailed to me at colterjl@efane.navfac.navy.mil.

Sincerely,

JAMES L. COLTER
Remedial Project Manager
By direction of the
Commanding Officer
