Re: Contract N62470-89-D-4814
Navy CLEAN, District III
Contract Task Order (CTO) 0140
Draft Final Effluent Study Report
for IR and UST Sites
MCB, Camp Lejeune, North Carolina

Dear Ms. Berry:

Enclosed are six (6) copies of the referenced report which considers the options and estimated costs for providing and maintaining groundwater treatment systems for IR and UST sites. Copies of the report have also been submitted to Mr. Neal Paul, AC/S, MCB Camp Lejeune.

Comments received from LANTDIV and from the November 2, 1993 review meeting have been incorporated into the Draft Final Report. In addition, updated information on the IR and UST Sites has been incorporated into the report. Finally, the number of "hypothetical" UST sites considered in the report has been reduced from 140 sites to 100 sites. These revisions resulted in decreases in the present worth costs for all four alternatives considered.

As discussed at the project review meeting, this report is intended to provide LANTDIV and MCB Camp Lejeune with information to be used in planning future strategies for groundwater remediation projects at the base. As such, consideration should be given to periodically updating and revising this document as additional information on the IR and UST sites becomes available.

A Total Quality Corporation
