Subject: State Comments on Eco Risk Assessment SWMU 303/318

See Attached State comments by David Lilley on the Ecological Risk Assessment for SWMU 303/318. A signed hard copy will be sent at your request otherwise the attached comment letter by Dave Lilley can be printed and used for your hard copy file. In the future this will be the procedure for RCRA SWMU document review and comment for Risk assessments.

Thanks,  
Randy McElveen, NC Superfund Section

RE: Comments on the Ecological Risk Assessment portions of the Draft – SWMU 303/318 RCRA Facility Investigation Report, MCB Camp Lejeune, NC September, 2005

1. According to Table 4-9, the concentration of isopropylbenzene in SWMU318-GW01 is 4 ug/L, not 2J ug/L as appears in Table 7-4. Please correct and double check Tables 7-3 and 7-3 to ensure the lab data has been copied to these tables correctly.
2. Table 7-3: 1,2,4-trichlorobenzene, 1,3-dichlorobenzene (m-), and 1,4-dichlorobenzene (p-) should all have ESVs of 10 ug/kg according to the 2003 DENR guidance. Please correct.
3. Table 7-6: Since selenium and silver were retained as soil COPCs in Table 7-3, they should appear in Table 7-6. Please correct.
