Randy, we are grateful for your quick response.

Regarding your concerns highlighted in the text, the RCRA team will be following the new Master Project Plans prepared for the Camp Lejeune CERCLA program. These plans have been adjusted to include your concerns about well volumes removed during purging. Basically, they state that a minimum of 3 well volumes will be removed if water quality parameters do not stabilize, and a minimum of one volume if the parameters do stabilize. You have provided acceptance of these changes in your review of the response to comments on that plan. Please let me know if I misunderstand that issue

Louise

Good afternoon Louise,  
my comments are on the attachment in yellow highlight.

1/26/2006

Dave Lilley is in the process of reviewing the responses to the HH and Eco Risk assessments. I will forward his responses when he has completed them.

Thanks,

Randy McElveen, NC Superfund Section
