Ms. Townsend,

The following comment concerning Site UXO-01 ASR#2.23 was in the attached letter:

"However, more discussion should be included to provide the rationale for selecting the designated "one acre" area for investigation as opposed to the other remaining nine acres."

In response to this comment, the following will be added to the UXO-01 report to clarify:

"The DGM survey was conducted along 3-foot wide parallel transects every 30 feet across the site, totaling approximately 1 acre, and yielded a total of 249 geophysical anomalies representing potential subsurface MEC (Figure 2-5)."

Thank you! The report will be finalized as there are no additional comments from the partnering team.

Tom and Keith,

Attached is EPA's letter for UXO-01...we're good for NFA but need to provide more supporting information/text.

Thanks,
Matt
