Subject: Draft Remedial Action contractor's Closeout Report, OU12 (Site 3).  
Remediation of PAH Contaminated Soil, MCB Camp Lejeune, NC.

The following are comments that I have on the subject draft report:

General comments:

1. None

Specific comments:

1. Section 1.3 Executive Summary. In the third paragraph, discussion regarding six piles that exceeded project disposal criteria... The report should state that contact/coordination with regulator(s) did take place. Recommend that some discussion regarding regulator review/participation took place regarding the soil and risk calculation.
2. Section 9.0 Observation ....- A typo needs to be corrected in the second line "excavation were wider ~~that~~ than projected."

If you have any questions regarding these comments, please feel free to give me a call at (757) 322-8422 or return email.
