SUBJ: Final Interim Remedial Action Report
Operable Unit 12, Site 3
MCB Camp Lejeune NPL Site
Jacksonville, North Carolina

Dear Mr. Stevens:

The U.S. Environmental Protection Agency (EPA) Region 4 has reviewed the above subject document and approves the document as written. This document has been prepared in accordance with EPA OSWER Directive 9320.2-09A and will be used as the basis for development of the site Final Close Out Report.

The "Final Interim Remedial Action Close Out Report" addresses all conditions stated in the Record of Decision, dated May 15, 1997 and the Amended Recorded of Decision, dated June 20, 2000. The remedy for OU12 (Site 3) included excavation of PAH-contaminated subsurface soils, groundwater monitoring and land use controls.

EPA looks forward to continuing the exemplary working relationship with MCB Camp Lejeune and Atlantic Division Naval Facilities Engineering Command as we move toward a final cleanup of the NPL site.

Sincerely,

A handwritten signature in black ink that reads "Jon D. Johnston".

Jon D. Johnston, Chief
Federal Facilities Branch
Waste Management Division

cc: Dave Lown, NCDENR
Neal Paul, Camp Lejeune

Stevens, Kirk (EFDLANT)

Subject: Site 3

Kirk,
Once the EPAs and State's comments have been incorporated into the Draft RA Closeout report, we concur that this report be moved to final.
Let me know if you have any further questions
Rick
