Analytical Data for Split Samples
MCB, Camp Lejeune, North Carolina

Dear Ms. Glenn:

This letter is to provide you with the split sample results from three samples collected from the surface water, sediment and soil during the field investigation at Site 6. You requested these results during our meeting on December 9, 1992. According to our field personnel, Baker Environmental split samples designated as 6-RV7-SW-06, 6-RV7-SD-06, and 6-201B-SB13-00 with Dynamac Corporation.

The analytical results are incorporated with other samples as part of a Sample Delivery Group (SDG). Split samples were analyzed for full TCL Organics/TAL Inorganics. Validation of these samples has been completed by our validation subcontractor.

After completing your review of the analytical findings, please return these original data packages to me. If there should be any questions pertaining to the analytical findings, please contact Mr. Matthew Bartman at (412) 269-2053.

Sincerely,

BAKER ENVIRONMENTAL, INC.
