

**NOTICE OF NAVY'S INVITATION  
 FOR PUBLIC COMMENT ON THE  
 Proposed Remedial Action Plans  
 Operable Unit 10, Site 35 and  
 Operable Unit 21, Site 73  
 Marine Corps Base Camp Lejeune**

The Department of the Navy (DoN) invites public comment on the Proposed Remedial Action Plans (PRAPs) for Operable Unit (OU) 10, Site 35 and OU 10, Site 73 located on Marine Corps Base (MCB) Camp Lejeune. The PRAPs identify and discuss the preferred alternatives for soil and groundwater remediation activities at Sites 35 and 73.

In accordance with 40 CFR 300.430(f)(2), the assessment of risk information as related to both human health and the environment and the preferred alternative is summarized in the PRAPs for Sites 35 and 73. The preferred alternative for Site 35 is in-situ air sparging using a horizontal well, monitoring of the natural degradation of chemicals of concern (COCs), and land use controls (LUCs). The preferred alternative for Site 73 is groundwater treatment by air sparging (in-situ aeration), downgradient enhanced reductive dechlorination (ERD) injections, monitoring of the natural degradation of COCs, and LUCs.

The PRAPs are based upon the findings of previous site-related documents contained in the DoN's Administrative Record for MCB Camp Lejeune. The Administrative Record can provide you with important background and site investigation information about Sites 35 and 73. Background documentation and the PRAPs are located for public review on the internet at [http://public.lantops-r.org/sites/public/lejeune/Sites35\\_73Prap.aspx](http://public.lantops-r.org/sites/public/lejeune/Sites35_73Prap.aspx). The website can be accessed at the following location:
