Re: Revised Submittal of Draft Cleaning Work Plan
North and South Treatment Plants, Site 78
Contract N62470-93-D-3032; Delivery Order 0118
MCB Camp Lejeune, NC

Dear Ms. Landman:

Submitted for your review and approval is the Revised Draft Work Plan for Systems Cleaning for the North and South Treatment Plants at Hadnot Point, Site 78, MCB Camp Lejeune, NC. This plan has been revised to incorporate comments received from the Base, COTR, LANTDIV, and Baker on the original Draft Plan submitted on September 19, 1996.

The revised draft has incorporated the basics of the O'Brien & Gere Systems Operation and Maintenance Manual. Included as Appendix A to the Revised Draft Work Plan is a Site Specific Health & Safety Plan which has been updated to include the cleaning tasks.

Attached please find two schedules, one depicting a December 1996 cleaning and the second showing a January 1997 cleaning event. To meet the December schedule, it is requested that we receive approval of the Revised Draft Plans no later than **November 22, 1996**.

We have included resumes of three of our engineers. One of these individuals, Fred Haas, is scheduled to be available for the December cleaning event. Currently, we are not able to name the individual available for a January event, but anticipate that it will be one of the three.

OHM is aware of the short approval turnaround time requested but due to the upcoming holidays is unable to offer other alternatives. (A demobilization and re-mobilization after the Christmas holidays was considered but cost consequences rendered this alternative unacceptable.)

As always, please do not hesitate to contact us for further clarification. Thanks for your cooperation.

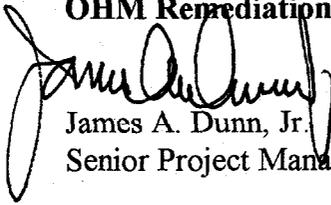

Ms. Kate Landman
