RE: NC Superfund Section Comments
Draft Engineering Evaluation/Cost Analysis
Site 84
Marine Corps Base, Camp Lejeune

Dear Ms. Landman:

We have completed our review this document and agree with the recommendation to remediate PCB contaminated soils using the Coralplex Chemical Dechlorination. We look forward to learning more about this new technology. It may be appropriate for other PCB sites in North Carolina.

We appreciate the opportunity to review this document. Please call me at (919) 733-2801, extension 278 if you have any questions.

Sincerely,

David J. Lown, LG, PE
Geological Engineer
Superfund Section
