Mr. John C. Lank, Jr., P.E.
Chief, East Unit, Resource
Conservation and Recovery Act
Waste Compliance Section
United States Environmental
Protection Agency, Region IV
345 Courtland Street, N.E.
Atlanta, Georgia 30365

Dear Mr. Lank:

This letter is intended to provide written notification of additional field work planned for eleven (11) Solid Waste Management Units (SWMUs) that were found to require additional investigation upon completion of the previous phase of field work. The results of this field work will supplement the Draft Final RFI Report for 21 Units (HALLIBURTON NUS, April 1992). The investigation will be accomplished in accordance with the previously approved Task III RFI Work Plan (NUS, May 1991a).

The eleven (11) SWMUs requiring additional investigation, including groundwater sampling, soil sampling, and/or surface water sampling are as follow:

RFI Unit 4	RFI Unit 34
RFI Unit 6	RFI Unit 35
RFI Unit 7	RFI Unit 39
RFI Unit 12	RFI Unit 41
RFI Unit 21	RFI Unit 55
RFI Unit 33	

In addition to investigative efforts, removal action for petroleum contaminated soils are planned for three (3) units (RFI Units 33, 34, and 35). Soil samples will be taken in the excavation walls and floors to determine whether all contaminated soil has been removed.

One (1) copy of the Work Plan Addendum is enclosed to provide you with additional information regarding the upcoming field event. However, as documented in our letter dated September 3, 1992 and as agreed in your letter dated October 15, 1992, the Work Plan Addendum and the additional field work planned does not require approval from EPA as the investigation is being performed in accordance with our previously approved work plan.

If you have questions or comments, please contact Ms. Renee Henderson or myself at (919) 466-4598/4599.

Sincerely,

R. D. Nelson
Natural Resources and
Environmental Affairs Officer
By direction of
the Commanding General
