Subject: MFA Addendum

Hi Chris,

Quick question about the tonnage of soil reported in the MFA IMR Addendum #1. On page 4-1, the third paragraph of section 4.0 states that 806 tons were processed under this addendum resulting in a total of 21,015 tons. Table 4-1 has different values for soil tonnage. Specifically, the table identifies 887 tons of additional soil processed for a total of 22,061.

Can you clear this up for me?

Thanks!
Pete
