Subject: **Draft**
 Interim Measures Report for Solid Waste Management Unit 16 - Cast High Explosives
 Fill/Building 146 Incinerator at the Naval Support Activity Crane in Crane, Indiana

Dear Mr. Hickey:

Enclosed for your review is a printed unbound copy of the subject Draft Interim Measures (IM) Report describing soil and infrastructure removal actions performed to address previous environmental report recommendations for Solid Waste Management Unit 16 (SWMU 16) - Cast High Explosives Fill/Building 146 Incinerator at Naval Support Activity (NSA) Crane in Crane, Indiana. The attached Draft IM Report is based on information provided by the Environmental Multiple Award Contract (EMAC) remediation contractor selected to complete this activity, Lee and Ryan, Inc. (L&R). The enclosed draft IM report is current through the completion of activities during February 2014. Due to severe winter weather and freezing temperatures in February, site topsoil placement, soil reseeded, and final restoration activities have not been completed for the SWMU 16 IM site. When L&R eventually completes the final SWMU 16 site restoration actions during more favorable weather, it is presumed that L&R will provide relevant field paperwork and project photographs to Tetra Tech to include those delayed restoration activities in the draft-final IM Report.

The electronic files used to produce the subject IM report have been recorded on the enclosed Compact Disk (CD) and are certified as "virus free." The CD includes both native (updatable) format and Adobe Acrobat (.pdf) format files, as required for task order electronic data deliverables for NAVFAC. Electronic files for the IM photographs have been added to the CD at the request of Mr. Tom Brent (NSA Crane). Please contact Ralph Basinski at (412) 921-8308 (email: Ralph.Basinski@tetrattech.com) or Rick Barringer at (412) 921-8524 (email: Rick.Barringer@tetrattech.com) regarding any questions/comments.

Sincerely,

Ralph Basinski
 Project Manager
