

**RMT, INC.**  
**TELEPHONE CALL MEMORANDUM**

~~To~~ From: Doug Hildre  
Affiliation: FMC  
Phone No.: -  
By: E. Gredell   
Date/Time: 1-16-92; 3:00 p.m.

Project No.: 1870  
Project Name: NIROP

He called to give me 2 comments on the notes for the last TRC meeting.

p. 2, comment #B.5.: He said that FMC has designed the piping to supply ground water from the pumpout system to the air compressor for cooling. However, this piping has not yet been installed.

p. 2, comment #B.7.: He said that the actual quantity of soil removed is 2,872 cy.

I mentioned that there is no formal procedure for publishing corrections or updates to information in the TRC meeting notes, except to mention the corrections at the next TRC meeting. These corrections for the TRC #12 notes will then be included in the notes for the next meeting (TRC #13). I said I would relay his corrections to J. Shafer.
