RE: Alternatives Array Document for the Soils Operable Unit  
(OU#2), at the Naval Industrial Reserve Ordnance Plant,  
Fridley, MN

Dear Mr. Cabiness:

The U.S. EPA has completed the review of the revised Alternatives Array Document, August 1994, for the Soils Operable Unit (OU#2), at the Naval Industrial Reserve Ordnance Plant, Fridley, MN. U.S. EPA agrees with the Navy's incorporation of U.S. EPA comments on the Alternatives Array document, and is awaiting the final copy of the Alternatives Array Document for the Soils Operable Unit (OU#2). U.S. EPA understands that concerns regarding specific anomalies discovered during investigation of soils outside of the Ordnance Manufacturing Building, will be addressed in the Feasibility Study for OU#2.

Sincerely,

Thomas Bloom  
Remedial Project Manager
