RE: Work Plan Addendum No. 1 - Modification to the Extraction System and Abandonment of
Production Wells, Naval Industrial Reserve Ordnance Plant, Fridley, Minnesota,
August 2000

Dear Joel:

The United States Environmental Protection Agency (U.S. EPA) has completed review of Work Plan Addendum No. 1 - Modification to the Extraction System and Abandonment of Production Wells, Naval Industrial Reserve Ordnance Plant, Fridley, Minnesota, August 2000. U.S. EPA submitted review comments on July 18, 2000. Incorporation of U.S. EPA's review comments was completed and replacement pages were sent in August 2000. U.S. EPA informally (verbally) approved the Work Plan Addendum No. 1 after the replacement pages were added and review completed.

The purpose of this letter is to formally (in writing) approve the Work Plan Addendum No. 1 - Modification to the Extraction System and Abandonment of Production Wells, Naval Industrial Reserve Ordnance Plant, Fridley, Minnesota, August 2000. U.S. EPA understands that significant progress has been made towards implementation of the approved modifications to the existing groundwater extraction well system.

Sincerely yours,

Remedial Project Manager
