Subject: RE: Draft SSP Closeout Report for Depth Charge Testing Area
Attachments: image001.gif

Bryan,

On April 20, 2010 VDEQ received an email which provided a link to an ftp site where and electronic version of the Draft Site Screening Process Closeout Report for the Depth Charge Testing Area dated April 2010 was available for review. VDEQ reviewed the electronic version of the document and offers the following comments electronically. A formal letter providing these comments will not be prepared unless requested.

1. Section 2.1: In the last sentence of the 2nd paragraph, please change "north" to "south".
2. Section 2.2: In the 2nd paragraph please insert the SMP language from the SSP Closeout Report for the Anti-aircraft Rifle Range, 1944 Pistol Range, and 1953 Pistol Range .
3. Section 3.3.3: Please revise the opening sentence of the 4th paragraph as follows, "During the 66 years since the test, if the depth charges did not detonate the MCs torpex and HBX may have been released to the environment if the munitions casings were compromised."
4. Section 3.3.4: In the last sentence of the 1st paragraph please change the word "though" to "through".

This concludes VDEQs comments on this document at this time. Please, let me know if you have any questions.

Paul E. Herman, P.E.

Why does everybody stand up and sing "Take Me Out To The Ballgame" when they're already there?

Subject: Draft SSP Closeout Report for Depth Charge Testing Area

Hello everyone,

Attached is an electronic transmittal letter for the Draft Site-Screening Closeout Report for the Depth Charge Testing Area indicating the document has been posted on the ftp site and is now ready for your review. The link and access information for the ftp site is below. If you have any difficulty accessing the document, please let me know.

Thanks,

David
