To Restoration Advisory Board Members:

The Naval Amphibious Base (NAB) Little Creek is pleased to announce the availability of the Final Project Plans for Site Investigation at Solid Waste Management Unit (SWMU) 3 and Installation Restoration (IR) Site 8. Comments received on the Draft Final, submitted in July, were incorporated into the Final document. Implementation of the Project Plans is currently ongoing. The majority of the wells have already been installed and sampling will continue this week and finish next week. The Final Project Plans are enclosed for those members requesting a copy, otherwise, the Executive Summary is enclosed. The documents are also available for review at the information repositories and at NAB Little Creek.

NAB Little Creek is also pleased to announce a Site Visit on Thursday, October 8, 1998, at 1:00 p.m. The purpose of the Site Visit is to allow Members to see the Sites in the IR Program so they can better understand the documents and projects that are undertaken by the Navy. Directions to the Base Civil Engineering (BCE) Department are enclosed. From BCE, we will travel in vans to whatever Sites Members wish to see. However, this Site Visit is open to the public, so if anyone else would like to attend, they are welcome. Due to the extra security on base, we will need your Social Security Number. Therefore, if you did not contact Kelly Greaser with this information for the past RAB meeting, please call her prior to the Site Visit. If you have any questions, please contact Kelly, 462-4571.

Sincerely,

MAUREEN E. CONNORS  
Environmental Quality Division  
By direction of  
the Commanding Officer
