Subject: Naval Amphibious Base Little Creek  
*Draft Technical Memorandum Work Plan  
Additional Groundwater Investigation Activities  
SWMU 3, Pier 10 Sandblast Yard*

Dear Mr. Park:

The Virginia Department of Environmental Quality (VDEQ), Office of Federal Facilities Restoration has reviewed the *Draft Technical Memorandum Work Plan for the Additional Groundwater Investigation Activities at SWMU 3, Pier 10 Sandblast Yard* dated August 2007. Based on the VDEQ review we offer the following comments:

1. Page 1, Introduction: In the 3<sup>rd</sup> paragraph, please identify the 7 new wells by well ID, e.g. LW03-MW09 to LW03-MW15, and call out the 2 high concentration wells from that group, LW03-MW11 and MW12.
2. Table 1: The sample depths shown for wells MW09, MW10, and MW14 do not seem to coincide with the depths of the nearby DP hits. For example, the DP hits in the vicinity of well MW09 were in the 8'-12' range yet the proposed sample depth for MW09 is 15.5' and the hits near well MW10 were in the 6'-10' range but the sample depth proposed is 17'. How were the sample depths for the new wells determined? Please add the explanation to the "Groundwater Sampling" section.

If you have any questions concerning this comment, please give me a call at (804) 698-4464.

Sincerely,

A handwritten signature in blue ink that reads "Paul E. Herman".

Paul E. Herman, P.E.  
Remediation Project Manager
