RE: Transmittals to the U.S. EPA and RIDEM
 Biota/Sediment Sampling Details and
 Proposed Dioxin/Furan Sample Analysis
 Naval Education and Training Center (NETC)
 Newport, Rhode Island
 TRC Project No. 6760-N81

Dear Mr. La Greca:

As requested, we have sent copies of the July 17, 1991 NETC biota/sediment sampling details letter addressed to you to the U.S. EPA and the RIDEM. The letter presents additional details on the planned NETC biota/sediment investigation. Along with the letter, we have also sent prints ("D" size) of each of the five sites (Sites 01, 02, 09, 12, and 13) showing all of the remedial investigation sampling locations. The maps will allow the EPA and RIDEM to review the proposed sample list for the dioxin/furan analyses which was discussed at the July 11th TRC meeting. Attached for your files are copies of the transmittal forms sent with the letter and maps.

In that we hope to complete the biota/sediment sampling by the end of August 1991, we recommend that you follow up with formal requests for comments from the EPA and RIDEM on both the proposed NETC biota/sediment sampling and the proposed archived samples for dioxin/furan analysis.

If any additional information is required by the EPA or RIDEM regarding these issues, please call me.

Sincerely,

TRC ENVIRONMENTAL CONSULTANTS, INC.

Jim Peronto, P.E.
 Project Manager
