Contract Task Order Number 0312

SUBJECT: Final Existing Data Summary Report
Basewide Groundwater Operable Unit Remedial Investigation
Naval Submarine Base - New London, Groton, Connecticut

On behalf of the United States Navy, Northern Division Naval Facilities Engineering Command and Naval Submarine Base - New London, please find enclosed for your records page changes which represent the final Existing Data Summary Report (EDSR) for the Basewide Groundwater Operable Unit (OU) Remedial Investigation (RI). The following information is enclosed:

- Volume I – Revised cover, spine, text, tables, and figures
- Volume II – Revised cover, spine, and D-size drawings (7A, 7B, 8, 11, and 12 only)
- Volume III – Revised cover, spine, cover page, and insert for Appendix B

Please insert the new material into your draft version(s) of the report, and discard the old material.

The enclosed material addresses comments received from the United States Environmental Protection Agency (USEPA) Region I (January 5, 1999) and the Connecticut Department of Environmental Protection (CTDEP; February 19, 1999) as per the Navy's responses (USEPA, February 24, 1999; CTDEP, March 11, 1999). Rebuttal information that was received from the USEPA (March 23, 1999) and CTDEP (March 26, 1999) regarding the Navy's responses was also considered during preparation of the final EDSR

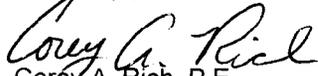

The Navy does not anticipate receiving any additional comments or making any revisions to this final report. If you determine that there are issues that have not been resolved, they will be addressed within the Work Plan/Sampling and Analysis Plan (WP/SAP) for the Basewide Groundwater OU RI. The draft WP/SAP is scheduled to be issued in June 1999.
