Subject: Table E.1

Sorry to send new comments in, but I just noticed something. We should be careful about the tense of what the ROD says. Table E.1 (TSCA entry) currently states "The proposed remedy would include a finding that the excavation remedy's PCB cleanup level of 532 µg/kg under TSCA risk-based standards would not pose an unreasonable risk of injury to health or the environment."

It should instead say:

This remedy includes a finding that the PCB cleanup level of 532 µg/kg under TSCA risk-based standards would not pose an unreasonable risk of injury to health or the environment.
