I wasn't entirely sure what version you were working off of. It appears that you accepted all of EPA comments and then handwrote notes onto the table?? If correct, I only have two minor comments:

1. Under Short-term Effectiveness for Alternative 2, change the proposed edit as follows:
insert "and chemical" after 'physical' and before 'risks'
change 'effectively controlled' to "limited"
2. Before the proposed edit under Implementability for Alternative 3, insert "in."

| RE: Revised Draft Final PRAP - Area A Wetland
|
>-----

All,

As we were preparing the ROD and comparing text from the FS and the PRAP, we noticed some wording differences between the FS and the comparative analysis table in the PRAP. We marked up the PRAP table to make it consistent with the FS wording, some of which was changed based on EPA comments, but I wanted to make sure you were ok with the mark-ups because there may be reasons why they should be a little different.

Therefore, please review that attached table (on page 11 of the PRAP) to see whether you agree with the mark-ups.

Thanks,

Aaron

All,

Attached is the revised PRAP based on EPA and CTDEP comments. Please review to make sure I incorporated your comments correctly and provide any additional comments, if necessary.

Also, just a reminder that we are waiting to hear whether you have any additional comments on the revised FS sections we sent you a few weeks ago. We would like to get the RI/FS finalized by the end of the month, before we finalize the PRAP in early June. This would keep us on schedule for having the public meeting in the middle of June.

Thanks,

Aaron
